

MODEL: PLANETARY GEAR BOX SET, 72001

STOCK CODE: 24030007

### Description

The planetary gearbox is a highly versatile system for reduction of high RPM electric motor to high torque low RPM application. The gearbox set supports 8 different types of gear ratio. It is often used in precision instruments because of the reliability and accuracy of the unit. A carbon brushes motor (RC-260) is included. This gear motor requires assembly. Assembly guide is included.

### Specification

- Gear Ratio: 4:1, 5:1, 16:1, 20:1, 25:1, 80:1, 100:1, 400:1
- Motor: RC-260, carbon brushes motor, 1 unit
- Operating Voltage: 3.0V-4.5VDC
- Slip clutch to protect motor from over strain
